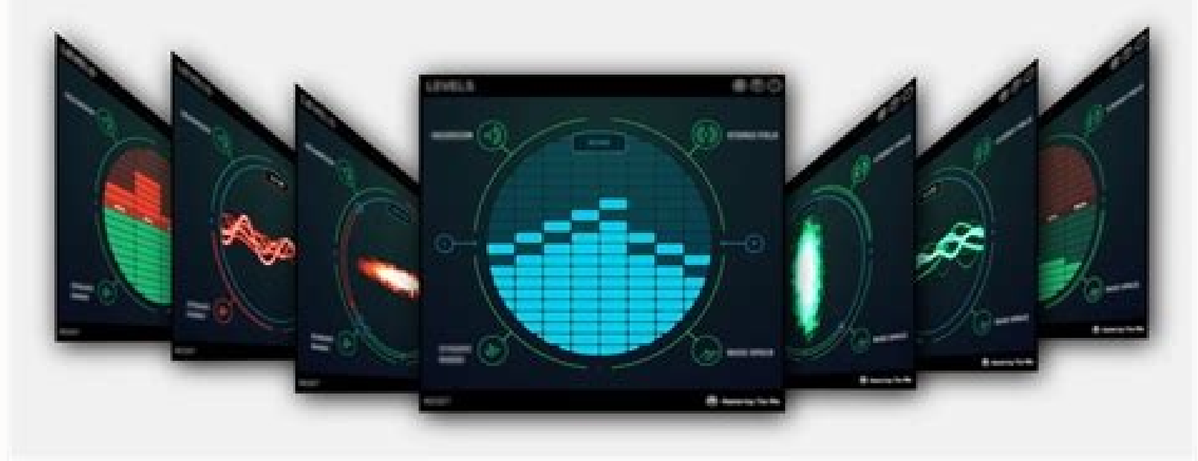
Mastering the mix expose manual



How to mix for mastering. Master stages whamex mixing instructions.

The channels of ãdio-params/HR as channels, but instead of the possibly enigmatic real layout sent to the device of ãdio, return a form readable by hopeful human humans. VO-Passion contains introspective on the active rendering passes of the VO and its execution times. This uses the same names used â ista in other places of MPV. The correction factor in the speed of speed with speed speed, multiplied at speed at which the player tries to reproduce the file. Partially traveled whether the current file is considered to be sustained, but only because the cache is active. (For example, the input.conf ficlo f bla # toggle bla would result in an input with comment = "switch bla", cmd = "BLA cycle".) This property is read only and notification of change is not supported. String of track/n/type describing the type of mother. It can be not implemented even if the volume operates. (Exact values subject to changes.) Vano/business params to the business in use as a string. No/false indicates software decoding. This property should be defined only during the hooks on_load or on_Load_fail, if it is not an effect (or may do something defined in the future). This property is not enough to render the subtitles correctly, because the ESF's head and the metadata by event is not returned. Ffmpeg-verse is the containing of the so-called av_version_info (). Use this to define the building property. (This uses the date and time records are stored in the file, so, for example, the reproduction speed does not influence the returned values.) In particular, the rate of virgin bits will be updated Just by keyframe and show the "past" bits rate. EDITION/COUNTRY/COUNTING NOT ADDICTION OF EDITIONS. TIME-PEs (RW) position in the current file in seconds. Generally, this corresponds if the video window is visible. Codec of ãdio-Codec-Name. List Demurher-Lavf List of the Libavformat Demater Names. (Not always needed in particular, the track can be decoded as a different number of channels.) Canels of track/n/demux track/n/demux Layout as indicated by the containment. If there is an equivalent property, prefer to define the property. The use is discouraged, because the metadata keys chain can conflict with other subproces. EOF-CACHED indicates whether the search range with the highest Timestamp points to the end of the flow (EOF). This is because the same underlying thing is used to search for and ressyncing.) Mister-if the mixer is active. This is relevant for some cases of hardware decoding and otherwise unavailable. Demxer-Start Time The Start Schedule Reported by Demurding in fractional seconds. Subtext The current text of the subtitle, regardless of subvisibility. This is directly recorded the option--audio-device, but in access to recordings, the output of being will be scheduled to recharge. If an outbreak is recorded on the property, it behaves as if writing -1. If the date and time records are bad or nervous (such as Matroska), constant bits rate flows may show a floating bit rate. The property can be assisted with the observation mechanism of the property in the client's API and the Moon Scripts. Playlist/N/ID Exclusive ID for this input. In particular, if --ytdl = yes it is used, and the URL is detected by Youtube-DL, the script will define this property as the royal MONTIA URL. If the file has information by track, but without information by lubum, the values per lubum will be copied of the values by runway today. If the caption is not based on text (ie DVD/BD subtitles), an empty sequence will be returned. When consulting the property with the client's API using MPV_format_node, or with moon MP.get_Property_native, this will return an MPV_Node with the following contain: mpv_format_node_map "MPV_format_String" sampled "mpv_format_50" channels "mpv_format_string The Params of but the format of the data recorded in the API of ãªio. (Before MPV 0.33.0, instead of that Returning -1, this property was not available if no entry into the reproduction list was current.) Write the current value back to the property is subject to changes. This provides the number bytes per second in a 1 second window (using the MPV_Format_int64 type for the customer's API). Configuration 1 will be resized to the size of the original video (or to be exact, the size of the volume filters). Unquestionably if the video is deactivated. Colormrix input range see Colormatrix. For a 30 fps video on a 60 Hz screen, it will be 2. display width, height of display the horizontal and vertical resolution of the current screen in pixels. Reproduction time position (RW) in the current file in seconds. By the title of Momia if the currently reproduced file has a tag of a title, use that. Track-list/n/pattern £ o SIM/TRUE If the track has the standard flag defined in the file, no/false or unavailable in case of constraint. MOUSE -POS/HOVER BOOLEAN - If the mouse pointer hangs the video window. Title of the editing edition/N/Title, stored in the file. This is the mother of what was actually scheduled, so 24 QPS at 60 Hz never remains at exactly 2.5, but the jitter, depending on the last table displayed. Video-frame-info/intertwining if the containment of the picture is intertwined. (Internally, the player can reign the decoder and perform a search to update the video correctly.) You can watch the other HWDEC properties to see if this was successful. The options that are integers can or are not included (they can be implored in min and at the mother). This implies that you can not look before this position. Current name of the current Demuxer. These are the same values as the Video/DW Params and the Vano/DH Params. When consulting the property with the client's API using MPV_format_node, or with moon MP.get_prorty_native, this will return one with the following containing: mpv_format_node_array MPV_format_node_map (for each device input) "name" MPV_atraytray "" " The name is what should be passed on to the optional optimal (and usually a very enigmatic api-specific ID), while describing is a text of Free Forms Free by Humans. List of Tricks/N/Lang Langus identified by the file. This is very primitive, inefficient and annoying to use. HWDEC-CORRENT the current decoding of hardware in use. Replace n with 0 0 range based on 0. This may differ from the break in special situations, such as when the player takes a break due to the low cache of the network. (This is also true in the event that the ãudio has been deactivated due to the reset of reboot, an earlier access to the recording to the device of the ãdio.) This property also Not informs which device is really in use. Subfinance the final hour of the current subtitle (in seconds). (Using-GPU-HWDEC-INTERROP can load it anxiously.) If there are drivers loaded, they will be separated by ,. If there are no way filters in use, this will contain the same values as the params of the video. List of Properties The List of Properties of the Upper High. The suggestions are good -living as exactly this property should work. The property of property change does not work and does not work. Track-List/N/Codec The name of the codec used by this track, for example, H264. Generally, but not necessarily, the item currently playing (see playlist-playing-pos. If the value is negative, this connection will be inactive and will not be activated by the entrance. Audio-PTS position current position of reproduction of the current file in seconds. The layout of this property may be subject to changes. (If this behavior will be kept possibly subject to changes.) Playlist-Playing-pos in the "play" on the reproduction list. The estimated number of estimated frames of arrears in â € ught due to external circumstances in the mode of synchronization of display. It is known only since the VO opens (and possibly later). Writing for this property can start reproduction in the new position. When consulting the property with the client's API using MPV_format_node, or with moon This will return an MPV_Node with the following containing: mpv_format_node_array mpv_format_node_map (for each chapter) "title" mpv_format_string "team" mpv_double AF, vf (rw) see-vf/-Af and the vf/af command. Total sum of packet bytes (some more estimated A © README) of the entire package line, including sustainable intervals. Playtime Remaning Time Remaning Scaled by Current Speed. If these values update or do not not depend on the MPV window changes depends on the window back -end. If it is constantly confident. (Exact values subject to changes.) Vano/Sig-PEPO params The marked signal peak of the Vano file as float. Secondary sub-sub-final, the same as the sub-end, but for the secondary subtitles. It is also possible that only one of them is defined. If the reproduction list is empty or if it is not empty, but no entry is "current", this property returns -1. See the flat command syntax for details. Display-Sync-Activa if--Video-Sync = exhibition is really active. Ao consultar a propriedade com a API do cliente usando mpv_format_node, ou com lua mp.get_property_native, isso retornarÃ¡ um mpv_node com os seguintes conteÃºdos: MPV_FORMBLEMBLOMBLOMBOMBOMBOMBOMBLOMBLOMBLOMBLOMBLEMBLOMBLEMBLOMBLEMBLOMBLEMBLOMBLEMBLOMBLEMBLOMBLEMBLOMBLEMBLOMBLEMBRAT_MAP_MAP "MPV" MPV "MPDOMP_MAP_MAP_MAP" "eof-cached" MPV_FORMAT_FLAG "fw-bytes" MPV_FORMAT_INT64 " FILE-CACHE-BYTES "MPV_FORMAT_INT64" CACHE-END "MPV_FORTET_DOUBLE" READER-PTS "MPV_FORMAT_DOUBLE" CACHE-DUATION "MPV_FORMAT_DOUBLE" RAW-INPUT-RATE "MPV_INT_INT64 ORHER FIELDS (MIGHT IS CHANGED OR FUTURE): EOF If T. Reader reached the end of the file. There may be vain interoperation drivers for the same hardware decoder, depending on the platform and VO. Note that this is just an estimate. The intervals are in arbitrary order. FPS.) estimated fps Replace n with 0 chapter based on 0. each frame type frame A rie of additional subprortes. This can be used to verify support for a specific format or use com-demurse-lavf-format. This is different from the way only in special cases. Seeking if the player is currently seeking or trying to restart reproduction. This is redundant to the channel field described above. You must use the command command of the list to modify the containment. In some cases, the protocol will not be really supported (consider https if FFMPEG is not compiled with TLS support). This is an automatically attributed whole ID that is exclusive throughout the life of the current MPV Core. VO-PASS/TYPE/N/PICO The peak execution time (higher value) within this range of mothers in nanoseconds. Range file file/n/n/external file name the file name if the range is an external file, otherwise indispensable. If BOF-CACHED and EOF-CACHED are true and only 1 range of cache, all flow will be stored in cache. OSD formats rotate these values in kilobits (or megabits, if appropriate), which can be avoided using the value of gross property, for example with $ {= Video-bitrate}. List of reproduction/no. They are returned without dragging: // suffix (which is still necessary). (Technically, the notification of alteration is activated the first time this property is read.) Device of ãªio (RW) define the device of ãª. Option-info//Options If the option is an option of choice, the possible options. Only if the file file file contains these fields and only if the MPV analyzer supports it to the format of the supplied reproduction list. Note that this is still not necessarily what the video window uses, because the user can change the size of the window and all the real make yours Scale regardless of the filter chain. There should not be no reason to access options/ instead of , except in situations where the properties are different or conflicting behavior. Currently, it returns a variety of options for each profile. For subtitle ranges, 0 represents SID and 1 represents the secondary SOD-SID. For segmented/vain parts files, this will return the size of the main or manifest file, whatever it is.) Total Member of Estimated Table Book frames in the current file. Note that MPV does not use this value internally and the correspondence of ligaments can work a little differently in some cases. Verification of protection status ... The actual size of the video window may still be different from this, for example if the user redeems the video window manually. If there are active demuxing ways, this will return only information about the "main" demxer, but may be changed in the future to return unified information on all demuxadores. Note that the matrix of options is not a map, as the request is possible and the duplicate inputs are possible. If this value is set while the window is on a full screen, the multiplier will not be applied to the window to be removed from that state. Note that any of the listed facts can change at any time without a warning. It is an improvised solution that can disappear at any moment (for example, when a better solution is disposed of). This property is defined during the events MPV_event_start_file (FILE START) and MPV_Event_start_end (FILE END) events. Another possibly strange observable state is that if the reproduction list is executed during reproduction, this property will be defined as the entry of the reproduction list to play the follow (unlike the previous case). (Not always need.) Video-ralist/n/demux-fps spps, as indicated by the containment. Range/n/n/external yes/true if the range is an external file, no/false or otherwise. When consulting the property with the client's API using or with moon mp.get_property_native, this will return an MPV_Node with the following contain: mpv_format_node_array MPV_format_node_map (for each currentlist) MPV MPV "Playing" MPV_format_flag (same) "Title" MPV_format_String (optional) "ID" MPV_FORT_INT64 List of Ã ªio/Vano/Sub-Flashes, current entry. See the current window scale for the real window size value. (The semageic is the same.) Avsync is the last difference of synchronization a/v. It has the same effect as writing to replace display-fps. was invoked). VF-metadata/ added by video filters. Defining this as a new value will always update the cursor and redefine the internal timer. BOF-CACHED indicates whether search range with the lowest points of Timestamp to the flow of flow (BOF). In addition, they are not being formatted OSD, although the same can be reached with, for example $ {= Video Bitrate}. The coding names (driver inputs) can be transmitted to - -OVC and - -oac (without the LAVC: prefix required by --VD and - -AD). Option-info//set locally if the option was defined by file. Disposed only for corresponding information ranges stored in the source file. (There is no way to ensure synchronization if two scripts try to update the same key at the same time.) Work directorate the work directorate of the MPV process. Video-bitrate package, package-biterate package, bitrate package and depreciated for the biterate, biterate and sub-brat. If events correspond to the current reproduction time, they are concatenated with line breaks. You should avoid using it unless you absolutely need it. They behave exactly the same, but return a value in kilobits. How these are treated details can change in the future. It also includes rounding errors (which can happen especially with bad date and time records). The control of control is the specific implementation of implementation and is unhappy for anything else. Additional Data Perf-Info performance. Focused if the window is focused. List of chapters of chapter, current entry scheduled. If the decoding is active, return one of the Values used Video-special (RW) depreciated. Note that the options that behave as options of choice, but are not in the actual choice of choice internally, may not have these dispatches. VO-Passes/Type/N/AVG Time Mother of Execution of this pass, in nanoseconds. Replace by the name of an option of no higher. This makes sense only with the show-text command or options that define OSD messages. VSYNC-Jitter estimated VSYNC's duration of the duration of the duration. This is available if the display-Sync is active only. This describes the area in which the video is rendered. duration of the duration of the current file in seconds. Always returns 0. By defining this property in the full or maximized screen state, the behavior is the same as the window scale. Metadata/List/n/Name -Chave of the input of the input of metadata. This member is missing if the cache of the file has not been activated with-cache-on-disk = yes. This also returns yes/true if reproduction is restarting or if nothing is playing. Libass-Versã £ o The value of ass_library_version (). It allows the same access to access (using subprorteids). When querying the property with the client API using MPV_FORMAT_NODE, or with Lua mp.get_property_native, this will return a mpv_node with the following contents: MPV_FORMAT_NODE_MAP "pixelformat" MPV_FORMAT_STRING "hw-pixelformat" MPV_FORMAT_STRING "w" MPV_FORMAT_INT64 "h" MPV_FORMAT_INT64 "dw" MPV_FORMAT_INT64 "dh" MPV_FORMAT_INT64 "aspect" MPV_FORMAT_DOUBLE "par" MPV_FORMAT_DOUBLE "colormatrix" MPV_FORMAT_STRING "colorlevels" MPV_FORMAT_STRING "primaries" MPV_FORMAT_STRING "gamma" MPV_FORMAT_STRING "sig-peak" MPV_FORMAT_DOUBLE "light" MPV_FORMAT_STRING "chroma-location" MPV_FORMAT_STRING "rotate" MPV_FORMAT_INT64 " This is reo-in "mpv_format_string" meverial-BPP "mpv_format_int64" alpha "mpv_format_tring dwidth, size of the dheight. Track-list/N/replaygain-album-gain per-album replaygain values. Usually usually Remove the extension from the file. This property is not available if no file is loaded or the file is not editions. (See the option is the format video filter.) Type of vamo/alpha parames. Approximate information of the grand-infra-nodo of the current framework. This has vain subprortes. (Note that if an option is marked as a file location, even the local options and the old value and the old value, which will be restored at the end of reproduction, not power Be read or written at the end of the reproduction.) Option-info / additional information by option. This means that the value of the option will be restored to the value before the beginning of reproduction when the reproduction is over. Missing if unavailable. Video-params/appearance aspect aspect like float. End cache-end is Demurse-Cache-Time. It redirects to the correct entrance to the track list. Before MPV 0.14, this used to return the file time of the file (may affect, for example, transport flows). Shidpi is displayed on a factor scale as reported by the window back end. Replace n with the entry of the 0 reproduction list based on 0. It is not necessarily available on all platforms. Try to write an option while no file is being reproduced (or being loaded) results in an error. VO-Passla/Type/N/Desccript description of the human student of the pass. (It is possible that it returns yes/true while a file is loaded. Playlist/n/n/name name of the ENAM file © simo input. File-Cache-bytes is the number of bytes stored in the file of the file. by the filter label, which, which is not explicitly specified using @filter-label: syntax, will be nn. Playback-abort if reproduction is interrupted or should be Interrupted. OSD-Dimensions are the last known dimensions of OSD. For many complex types, this is not very accurate. You. This is subdivided into two types of paintings, VO-PASS/Fresh for fresh frames (which need to be charged, climbing, etc.) and VO-Passla/Redraw for Radrair weapons (which need to be painted). (I don't always need.) I need.) Vain metada of clan rotation, in the questions of the questions. Consultation of this property triggers the internal collection of some data and can slow the player's speed. The name of the file currently reproduced, with the stripped path. This has the same format as the decoder list. Note that this is usually interesting only Se-Keep-Open is activated, because if it contains, the player immediately reproduces the nearby file (or skirt or slow down) and, in these cases it is defined. I could make this out of reach. When consulting the property with the client's API using MPV_format_node, or with moon MP.get_Property_native, this will return an MPV_Node with the following contain: mpv_format_node_array MPV_Format_Node_MAP (for each decoder input) "codec" MPV) list of libavcodec coding list. In cases of broken singing, the intervals can overlap everywhere. You probably need to do additional filtering on the string returned to make it. Volume of the System A-Volume (RW). The metadata by chapter are very rare. OSD-Dimenshades/Vo-Window Remove aspect. 3D mode is 3D Reo of Video/Estão-in-in. Demurse-Via-Network, if the dismembered flow through the main Demuxer is probably thrown via the network. The total correction of A-V synchronization of total change. Sub-text-ass as a sub-text, but return the text in the ass format. Underrun If the reader could not meet the request of a new package decoder. This is a string that identifies the construction in some way, it is through a number of release verse or a hash git. When querying the property with the client api using mpv_format_node, or with moon mp.get_property_native, this will return to mpv_node with the following contents: mpv_format_node_map fields listed nas tags--Display tags--Display MPV-Versã To write, this only defines the position of the "current" item, without interrupting the reproduction of the current file (or the initial reproduction, if this is done in idle mode). It is used to distinguish decoding ways for the same codec. Contain-fps contain FPS. The player does not use any data on it (although some incorporated scripts can). Track/n/n/replaygain-track-paak, track/n/replaygain-track-track reproduce values. Video-Params/Light The type of light in use as a string. Options/ (RW) The value of the option -. Each consultation will redefine some internal state. List of tracks/n/selected SIM/TRUE If the track is currently decoded, not/false or unavailable if constant. This means that the small relative can be good, but larger searches can fail anyway. (Exact values subject to changes.) Video/Gama Params The gamma function in use as a string. Format of params of Params of Ã ªudio such as leaving by the decoder. (Exact values subject to changes.) Van Params/Nuble Cololled The Colorful Colorful as String. This is the same set of tags printed on the terminal. It can be "i" (intra), "p" (expected), "b" (Bi-DIR predicted) or unavailable. Track-List/N/Albumart Yes/True If this is an image incorporated into an Ã ªio or outer cover file, not/false or indispressible if constant. 2 define the double size, 0.5 half the size. See the explanation of current flags and playing on the breeding list. Playback list/n/current yes/true if the playlist-current-pos property point to this input, not otherwise or unavailable. This is necessary if you want to use the overlapping command. This returns a map of maps, where each number of the map represents a command. Technically, this returns the position of the latest package to a If the window is complete, this will return the value of the calculated scale from the last size not full of screen of the window. What is defined if the option is, for example changed in It is left undefined (which means it can change in the future). (This is annamel.) (Renamed demxer.) Name of the strike file (Full Way) of the Flow Layer file name. The following sub-casuals are defined: Video, Ádio, Under, Sub2, for example, the current/Lang streams return the language field of the current ãdioio range (the same value as The List of Tricks/N/Lang). This includes all general data and possibly not used (such as pruned data). Frameflower Framename the full path for Mom Currently Played. This property is just vaguely. The recursive profiles are not expanded and appear as special profile options. At the factory of MPV 0.9.x and rather, this does not return the currently active hardware decoder. MPV Configure the configuration arguments that have been passed on to the construction system (usually the way ./waf configures ... has the following subpresses (which can be read as mpv_format_node or table moon with mp.get_prorty_native): mouse-pos/ x, mouse-pos/ y ãštims known coordinates of the mouse pointer. It is used in OSD, the information may be disabled by a few frames due to redesign OSD and display of frames being a little disconnected, and you may have to pause and forcing a redesign. The requested type is selected via-Lavfi-Complex, the first is returned. Map of shared arbitrary strings between scripts for general use. an issue, which will be reflected by the property, although in the practical it is not important. Way to get a file name is not modified.) This has the subprorty: file name/no-oxt as the filename property, but if the text contains a., Remove all text The last one. When consulting the property with the client's API using MPV_format_node or with moon MP.get_prorty_native, this will return one one with the following contents: MPV_FORMAT_NODE_MAP "TYPE" MPV_FORMAT_NODE_ARRAY MPV_FORMAT_NODE_MAP "desc" MPV_FORMAT_STRING "last" MPV_FORMAT_INT64 "avg" MPV_FORMAT_INT64 "peak" MPV_FORMAT_INT64 "count" MPV_FORMAT_INT64 "samples" MPV_FORMAT_NODE_ARRAY MP_FORMAT_INT64 Note that directly accessing this structure via subkeys is not supported, the only Access is through the mentioned MPV_format_node. Secondary sub-sub-subrtidal, the same as the substart, but for secondary subtitles. Track/n/decoder-desc if this range is being decoded, the name of the man-readable decoder, the list of bands/n/demux-w, the list of bands/n/demux-h size of the tip, as shown by the containment. OSD-AS-CC $ {OSD-AS-CC/0} Disable Text Sequences of OSD, $ {OSD-Ass-CC/1} allows you again. In X11, these are the names Xrandr (LVDS1, HDMI1, DP1, VGA1, etc.). By the time of the team, this updates more frequently than once by board. In other words, it is not only not/false if there is a video reproduction. The Moon Script has helpers starting with util.shared_script_prorty_. Option-Info//Set-Offom-Commandline If the option was defined in the MPV command line. In some cases, this is not necessarily the file currently reproduced. The guess is not very trustworthy and often the property will not be available, even if the data is buffer. Description is defined as the name of the device (minus / MPV's specific prefix) if no description is disposedable or the description would have been an empty string. The advantage over the use of this rather than calculating it on other properties is that it again estimates the position of reproduction of the position of bytes, if the duration the file is not known. Trying to recover this property like a raw rope does not work. Reproduction list of reproduction list, current entry scheduled. SYMBÃRO NAME. File format File format. OSD-Width, Osd-Hight Last Osd Width OSD (can be 0). In some cases, this is a list separated by format names, for example MP4 MP4 MOV, MP4, M4A, 3GP, 3G2, MJ2 (the list can grow in the future for any format). The heuronistic used to determine if a flow is an image does not try to detect images in codecs normally used â € ught. Name of the list of reproduction/n/title of the entry. (Missing if the format does not have native id, if the range is a pseudo-pistor that does not exist this way in the real file, or if the format is treated by libavformat, and the format has not been allowed to have IDS Trail.) Tit of the range of range/n/title, as stored in the file. This is set for separate subtitles files. Display the update rate of the current screen. This has a subprook source: sample -shaped format params such as string. Note that, in general, MPV needs to guess that this is happening, and the guess can be inaccurate. Track-List/n/Image Yes/True If this is a range of video that consists of a grade image, not/false or indispressible if constant. Name of the Canãic Codec Codec, which identifies the format that the decoder can deal with. This is exclusive in the ranges of the same type (sub/ãdio/video), but otherwise not. Index-range/n/ff the flow of flow, as used by ffmpeg utilitarian. Writing for this can change the currently used hardware decoder if possible. Current Van-Void Half Driver (Name Used with-VO). This property is disposed only if the MPV is currently active and only if the underlying implementation supports volume control. OSD-SYM-CC inserts the current OSD Sadbolo as an OPAQUE OSD (CC) control. For more information, click here. Most options can be changed in the execution time writing for this property. This is an approximate estimate (it may not be responsible correctly for vain general expenses) and to in the demxer position search). Like MPV 0.18.0, the HWDEC-CURRENT is available for this purpose. For MKV files, the Ãdice usually corresponds, even if the standard (incorporated) demurp If the format is not alpha channel, it will be unavailable (but in future launches, it may change to no). Colormatrix redirects to videoparams/Colormatrix. Edit-list/n/id (RW) ID of editing as integer. This may contain false values easily. The property is not disposedable if no video is active. Defining this property as a different value will restart reproduction. Chapter/list/counting number of chapters. The subsidated planar formats use a different resolution, which is the reason for which this value is sometimes strange or confusing. If the window is not changed, the multiplier will be applied if the user boost the window later. If a search will be successful or not usually is not known in advance. An item from the breeding list is "playing" if it is being loaded, really playing or being discharged. The property is not preserved during the reboot of players. Only arinable if the options are numerical and the mother/mother has been defined internally. OSD-Dimensics/H Window Size Vo in OSD rendering units, OSD pixel OSD OSD dimensions (usually 1). This gives access to currently selected ranges. If the Option-Force-Window is used, it usually always returns yes/true. The frame counting frames were launched by VO (when using-fressrop = VO). This is the size of the video after the application of filters and appearance scale. The gross input rate is the estimated network layer input rate (or any other bytes -oriented input layer) in Bytes per second. List of tracks/n/id o id as it is used for -sid/-aid/-vid. Note that the duration of the file is not always known exactly, so this is an estimate. Property is redefined if the presentation of the present mother ends. At the time of time, time is set at the file range. Like MPV 0.31.0, that Returns the previously defined value (or the standard value) rather than the implied value of the actual window size. Often, it is the same as the codec. If no decoder is loaded, the property is not available. With MPV MPV And later, this strictly returns the option of setting set or property value, and the current editing property was added to return to the selected edition of the execution time (It matters with -edition = auto, the pattern). Notice of the Total Input Reproduction List of the Reproduction List. This does not include external circumstances, such as the rendering of the video being very slow or the grain driver somehow jumping a VSYNC. In addition, this value is dynamic and can change in time of execution. This input can be removed or change meaning in the future. (Exact values subject to changes.) Van Params/Rotate the intended rotation of display in degrees (in the honorary sense). Playlist-current-pos (RW) the "current" item in the reproduction list. It is possible that future MPV versions make these properties unavailable in this case. Option-Info//Deframing Value The standard value of the option. Depending on the exact internal state of the player, it may refer to the item on the reproduction list to reproduce below, or the item from the reproduction list used to determine what to play next. Width, height -height size. Range/n/n/n/audio-channels (depreciated) alias If you hold back to FileName property. This property is experimental and can be removed in the future. Demurse-Cache-State Each entry into approach ranges represents a region in the Demxer cache that can be sought, with departure and final fields containing the respective date and time records. It has the following subproces (which can be read as mpv_format_node or moon table with MP.get_Property_nation): OSD-Dimensions/W Window Size Vo in OSD rendering units (usually pixels, but can be staggered with pixels with you like XV). (Renamed Idle.) Core-Idle, if the course of reproduction is in pause. Old Version of Metadata/Key/. When consulting the property with the client's API using MPV_FORMAT_NODE, or with moon MP.get_prorty_native, this will return an MPV_Node with the following containing: Contension: MPV_FORMAT_NODE_MAP (for each track) "id" MPV_FORMAT_INT64 "type" MPV_FORMAT_STRING "src-id" MPV_FORMAT_INT64 "title" MPV_FORMAT_STRING "lang" MPV_FORMAT_STRING "image" MPV_FORMAT_FLAG "albumart" MPV_FORMAT_FLAG "default" MPV_FORMAT_FLAG "forced" MPV_FORMAT_FLAG "selected" MPV_FORMAT_FLAG "main -Selection "mpv_format_int64" externo "mpv_format_flag" externo-filename "mpv_format_string" codec "mpv_format_string" ff-index "mpv_format_int64" decoder-csC "mpv_format_string" Demux-w. "Demux-channels" mpv_format_string "Demux-amostrado" mpv_format_int64 "demux-fps" mpv_format_double "Demux-bitrate" mpv_format_int64 "Demux-rotation" mpv_format_ent64 "Demux-part64 mpv_formg) "Replaygain-rack-gain" mpv_format_double "repaygain-album-peak" mpv_format_double "repaygain-album-gain" mpv_format_double tracks de corrente/... o nÃºmero o f A primeira ediÃ§Ã£o Ã© 0. (Ã o mesmo que $ {Stream-End}. prioridade um nÃºmero. EdiÃ§Ã£o-List/N/PadrÃ£o Se esta Ã© a ediÃ§Ã£o padrÃ£o. Em todos os casos, definir o valor dessa propriedade sempre redimensionarÃ¡ a janela. Observe que as propriedades retornam um cÃ³digo de controle OSD opaco, que sÃ³ faz sentido para o comando show-text ou opÃ§Ãµes que definem mensagens OSD. A opÃ§Ã£o despeja mais informaÃ§Ãµes, mas Ã© uma solicitaÃ§Ã£o de recurso vÃ¡lida para estender essa propriedade, se necessÃ¡rio.) Encutidos de ligaÃ§Ã£o a lista de ligaÃ§Ãµes atuais de chave de entrada. Escrever para esta propriedade estÃ¡ depreciado. Use -1 para remover o sinalizador atual. Codec de Ã¡udio de Ã¡udio-Codec selecionado para decodificaÃ§Ã£o. Playlist-pos (RW) PosiÃ§Ã£o atual na lista de reproduÃ§Ã£o. Ã o mesmo que Demuxer-Cache-State/Raw-Input-Rate. Para arquivos somente de Ã¡udio, Ã© principalmente equivalente ao Time-POS, enquanto para arquivos somente em vÃdeo, essa propriedade nÃ£o estÃ¡ disponÃvel. metadados/lista/contagem nÃºmero de entradas de metadados. Antes do MPV 0.18.1, be used to infer the behavior of volume property. An example of this type of metadata is the cuts added by -vf = lavfi = cropdetact. If no current subtitles are present, or if it is present, but has an unknown or incorrect duration, the null will be returned. Vo-Drop-Frame count is a depreciated alias. For vaids that use modern formats of containment or video codecs, this is usually incorrect. Playlist-Pos-1 (RW) the same as the breeding list, but based on 1. This is a rarely used mechanism. There is an internal flag that decides whether the current entry of the reproduction list or the nearby should be played, and this flag is currently inaccessible for API usuals. The current window window scale (RW) the window scale value calculated from the current size of the window. (Ãštil in obscure situations, as during on_load hook processing, when the user can interrupt reproduction, but the script needs to end the processing explicitly.) Cursor-Autohide (RW) See -Curor-Autohide. Params

of the channels/channels The channel layout as a string. This is the case of automatically charged profiles, file file configurations and other cases. Use the Playlist-Play-Index command for guaranteed behavior. HWDEC (RW) reflects the option - -hwdec. Verification ... BITS MOTHER PER PIXEL AS PIXEL AS ENTIRE. See the description of the Stats script for some details. If this property returns yes/true, enter. This has a subprorticity: Video-params/pixelformatat the pixel format as string. Ligaments with a higher value are preferred on the ligaments with a lower value. The number of passes to any subtype can change frame to frame and should not be entrusted. € S times can be different. Breeding list/n/playing yes/true if the property of Point to this entry, not/false or unavailable otherwise. List of supported decoding decoders. This map has the following inputs: key the key name. Van of the sight/par pixels. Usually this is exactly the same You pass the MPV command line or the LOADFILE command, even if it is a relative path. If no current subtitles are present, the null will be returned. It can not be supported by all your. Names of display names of the display that the MPV window cover. This parano (as well as similar) can be replaced in the format video filter. Lane/N/N/Main selection indicates the selection order of the tracks for the same type. If the duration is unknown, the property is not available. Colormatrix-Primary See Colormatrix. Audio-Params/Samplete Sample. If a track is not selected or selected by the complex-lavfi, it will not be available. For example, in Alsa, this usually changes the whole system throughout the system, while with the pulseaudio, this controls the volume of application. Note that many options require reloading the file for changes to come into force. For example, the use of display-assync mode should never change this value of 0. Estimated display-fps at the actual rate at which display updates seem to occur, measured by system time. By pattern, the sequences of assaults are escaped to avoid accidental formation, and this property can disable this behavior. Driver the name of the decoder itself. (This can happen at least during state transactions.) In the state of "game", usually the same as the list of reproduction, except during the state changes, or if the list of Reproduction-Corrent-pos was written explicitly. Drop-Frame-Count is a depreciated alias. Video-Params/Colormatrix The Colormatrix in Use as String. (Today, this is exactly the same string specified at the source, in addition to removing blank space and comments. The moon helpers take care of it. For OSD, it returns a formatted list. -PT is the registration of the approximate date and time of the unique of the buffering range. It has an annoying name. Unavailable whether it is disabled. If there are current subtitles, return the last time of the end. Decoder-Frame-DROP-COUNT Frames of Vamous Frames By decoder, because the video is very at the same time (when using - -Framedrop = Decoder). This has the same value as the window scale if the window size has not changed since the definition of the option and the size of the window has not been restricted in other ways. Video-Params/HW-Pixelformat The underlying pixel format as a string. To make the property more friendly of the user interface, the updates of these properties are reduced in a certain way. Use this as playlist_entry_id fields. The unit is bits per second. This is linked to-video-override, but always reports the appearance of the current video if the video is active. What constitutes "network" is not always clear, it can be used for other types of flows not confidentable, may be wrong in certain cases, and its definition may be changing. Demurse-Cache-Time approximately buffer-turf time on the demurher in seconds. For reading, this is exactly the same as the list of reproduction. Vamous params the same as video params, but after the video filters were applied. It may be smarter to report an absolute DPI, however, this is how the hydpi support is implemented in most APIs of the operating system. Also see m-hidpi-window on scale. Video Video Bitrate, Bitrate and Sub-Bitrate Bits Calculated in the Package. List of tracks/counting number of tracks. For native subtitles, events that do not contain no text (but vector designs, etc.) are not filtered. Tulo/N/Time Cap If Alpha is present, this is defined as rectum or premul. Currently, it will restart the reproduction of the entry of the reproduction list. All of this can change in the future, so do not use it. Chapter of the Chapter Chapter-List/N/Trim as stored in the file. Sometimes, this can be increased in other situations, for example when the packages of are damaged or the decoder does not follow the usual rules. No guarantee of stability is given to any of these subprortids - they can radically change in the appeal. VO-Pass/Type/N/S Samples/m The gross execution time of a Sample for this pass, in nanoseconds. It is possible that it is normalized in the future.) IS_WEAK if defined as true, any connection of the existing and active user will have priority. List of Key Name Key Keys, equal to the output by-Pain-Keylist. It may be unavailable with some formats. Today, there is no mechanism to change the main leagues in execution time, except scripts by adding or removing their practices. The exact term varies, but it must usually be a handful of seconds. Replace n with the issue of 0. It works similar to the property of metadata. If no VOs are active or no interoper driver is known, this property is not available. Text subtitles in other formats are converted. (It is not always accurate.) Notice of the List of Tricks/N/Demux-Channel Cannel of Channels of Âª, as indicated by the containment. (Generally, only HR-channel params/channels make sense.) Not a member of ãdio-paramas/channel counting channels. This has a subprorticity SA. Contain only the part of the "text" of events. (This probably is unhappy and almost never different from the path.) Position of flow-posths in the origin flow. Video-Params/DW, Video/DH size Video size as full integer, sized for the correct proportion. Edion (RW) is currently mkv. Alias A tag list can be found here: vo-configured if Vo is configured now. Remonding the remaining time of the file in seconds. The duration of the cache is Demurse-Cache-Druation. If there are current subtitles, return the first hour of innio. The reading and record components of this option can be in Van Params/Aspect and Ascendant, respectively. Note that this may be potentially wrong if a dismantle that is not libavformat (--demurning = lavf) is used. Sub-initiation the innio of the current current subtitle (in seconds). (The mode of synchronization of display will make this the format.) * 100 for the RAW property value provided. This does not necessarily use the same values as HWDEC. But in the future, writing the current value will be ignored. Option-Info//min, Option-Info//Mother Max and Mother's Values allowed for option. Other than that, he returns -1. Usually it is exactly 1. These properties should not be used more. Selected Codec Vano-Codec Codec for decoding. Current and current and current output driver (name used with - -AO). This is highly specific for implementation and can change at any time. Video-Params/W, Video/H Size Van Size as In Wholers, Without Correction of Applied Aspects. It has the same subprortids as the params of the video. A-Mute (RW) similar to volume AO but controls the silent state. (Computer of the properties above.) OSD-Dimensions/MT, OSD-Dimensions/MB, OSD-Dimensions/ML, Dimenshades/MR OSDs for Van (Upper, Lower, Right, Right). This returns a map of maps, where each number of the map represents a connection for a key/command. (Inaccurate files of files etc. unavailable in some rare cases. (Behavior from MPV 0.7.0.) Currency current reading speed between the cache and the lower layer (such as network). Decoders that can be passed by the E -AD files. It seems a little different from how it was specified at the source (for example, in Input.Conf). Other commands, events, etc. Write this property In a maximized window it can boost the window, depending on the operating system and the window manager. It is currently the same as the editing. When this value is false, because the video is backup, update them only when the pointer hangs the window. This is mainly for use with the customer's API and reflects what audio-device = help with the return of the Line Command player. In Windows, these are the names of the GDI (\ â € 20 <.Display1, \ .display2, etc.) and the first display in the list will be that the windows consider associated with the window (As determined by the monitorfromwindow API.) In macas these are the names of the exhibition products used to use the system information and only one display name is returned, because a window may only be on a screen. This option is relatively innisp. See start-up-time. Note that set a value to its previous value will not resize the window. What this option does depends on the API. The incorporated statistical script must be the usual usual; As it is grouped and constructed with the Source, he can use the knowledge of the internal MPV to render the information correctly. If you expect an absolute path, you will need to determine you, for example, using the Director-Director Property. In the previous versions of MPV, these properties returned a stretched (but bad) guess using a completely different mother. It will be inaccurate if the crash of frames is involved (such as when the framedrop is explicitly activated or after a precise search). It also allows the same moms to access (using subprortids). One of ãdio, Video, sub. This is an integer, coded in a somewhat strange way (apparently "hexadecimal BCD), indicating the release version of the Libass library linked to MPV. Not always available. VO-Passes/Type/N/Ãš last time of execution measured in nanoseconds. Before MPV 0.31.0, this returned what returns on a current window scale now, after the window was created. This replaces the Length property, which was after the release of MPV 0.9. This uses the size of the video as decoded, or if no video structure has yet been decoded, the incorrect containment) indicated size. current editing of the currently selected edition. Currently, this map has only one entrance: Name for the command name. Example--SD-MSG3 = 'This is ${Osd-Ass-CC/0} {\\ b1} Bold text' show-text " B1} In bold text "Any ass -replacement tags as understood by Libass can be used. (I don't always need.) BIT rate of track/n/demux-brato bits in bits per second. In pause for cache, if the reproduction is interrupted due to the cache. Full pathway path currently reproduced. Currently, if the topic is not reading. Like MPV 0.31.0, this property is not available if no exhibition FPS has been reported (for example, if no volume is active), while in older versions, it returned the option of the option £ o-DISPLAY-FPS. Contexts , -Ârse -Activity in which the activity is involved in gaining the activity for which a person or thing is employed to do hard work, or the effort spent on a product or achievement of specific tasks resulting of the effort of a work or creative or arthistical production the application of the mind to learn and understand a subject where the work of a formal, usually time consuming and systematic discourse on some Subject (mass noun) the execution or accomplishment of a task or task of tasks a state of slavery, slavery, or subjugation to the other person a written work or printed, consisting of the skills of a artisan or artisan the mechanical artisan of a movement or a state of a state of action or occupied or vigorous movement an attempt or effort or effort to achieve something that things are done to achieve a goal the effects or influence of something, usually a quantum product or subs an action or intervention action producing a specific effect that a horny act performed for or amu information or senance information for use in the creation of a book or other work tests of the skills of someone or internal fortress a task designated to students in an academic environment of of or manufacturing process or inventiveness of something a vigorous fan exercise session or training of an image drawn on the skin with paint and a needle a product and / or service made to meet a Expective need for a dramatic work for the stage or being transmitted to perform a task as part of the use of someone to exercise with a specific goal of functioning with a specific objective of producing as a result of an effort to operate A device or mothers to be working conditions to produce the desired effect to bring a high emotional state for the purpose of gradual degrees to shape or form a certain material (agriculture) to cultivate the soil to move from Hectic way to reach an answer through the wide to predict, usually so that Famãlia will do that someone works, usually hard to explore someone for someone for the beneficial, especially Mannei. Alumnimão, related to or caused by an occupation, dear Twitpic community - thanks you for all the wonderful photos you have taken over the years. The number of the first chapter © 0. If you are accessed with the customer's API, this returns an MPV_format_node_map, with the tag keys mapping to mark values. Name of the section of the section This ligament is part of. If the property is accessed with the MP.get_Property_Nativo da Moon, this will return a table with metadata key mapping for metadata values. Writing this property while no way of being active is not automatically activated the ãdio. It can be ãº for JSON IPC usuals, because the command line player usually works with relative paths. Demurse-Cache-Didle If Demurse is idle, which means that the Demxer cache is completed at the requested value and is currently reading more data. HWDEC-INTERROP This returns the decoding driver/hardware output currently loaded. Likewise, the record -11 will put the player in idle mode (or departure reproduction if the idle mode is not activated). Vsync-ratio for how many vsyncs a picture is displayed in mom. This works by dividing the bit size of all packets between two -chamber frames by the Timestamp distance of presentation. This has a subprope San: Framework-in-INFO/Image Type The image type. (If no filter is This corresponds to the decoder's output.) This uses the day of the 10 previous frames of previous frames to calculate the SPF. Percentage position (RW) in the current file (0-100). If no VO is active, or if you will No reporting a value, this property is not available. Secondary sub-text, the same as the sub-text, but for the secondary subtitles. Approximate duration demurse-Cache duration of the Video in Buffer in the Demxer, in seconds. Video-Frame-Info/Repeat if the frame should be delayed when decoding. If you still think you should, you should use helpers instead of property directly. When consulting the property with the client's API using MPV_format_node, or with moon MP.get_Property_native, this will return an MPV_Node with the following contain: mpv_format_node_array mpv_format_node_map "for each edion)" IDP) /value pairs. Video-frame-info/tff if the containment is intertwined, if the upper field will be displayed first. Vo-Passes/Type/N/N/Tell the number of samples for this pass. Description describing human legible decoder and codec. Currently, the value of gross property is unhappy. Alias VO-PASS/TYPE/COUNTING NO PASSES. Cmd the mapped command for the key. The first entrance is in position 0. Gross -end position of the flow in bytes in the origin flow. FILE-LOCAL-NO-OFS/ (RW) Similar to options/, but by defining an option through this property, the option is redefined for its old value after the current file has stopped being reproduced. Generally, only the name of the chapter (title) is defined. This also applies to libav (the property is still named it.) This property is not available if the MPV is linked to older versions of FFMPEG and LIBAV. The formatting is stripped. EDITIONS NO MKV EDITIONS. It provides the actual OSD/window size (without including decoration designed by the operating system window manager). They are not documented because you should not use this property. AF-Matadata/ equivalent to VF-Matadata/, but for Â ° Filters. This because property reflects the option of window scale, window, Define an option for its previous value is ignored. The same as Demurher-Cache-Druation, but returns the last record of data and time of data in buffer on Demurher. If the entry in the reproduction list has been removed in any way during reproduction, but the reproduction has not yet stopped or is in progress to be interrupted, it also returns -1. Reading, modification and writing of the property manually could loss of data if two scripts update the different keys at the same time due to the lack of synchronization. FW-BYTES is the number of buffering package bytes from the interval from the current decoding position. This is currently the lowest FPS of any display covered by the video, as recovered by the underlying system APIs (eg Xrandr on X11). Note that you need to escape the character \, because the string is processed for exhaust sequesions before passing it to the Code. List of protocol list of protocol prefixes potentially recognized by the player. No. If the underlying Demurse rewrite the packets on the unmarked (made for some file formats), the bit rate may be slightly turned off. List of editions of the editions of editions, current entry marked. To access other information, such as the Start Chapter, see the property list property. List of ãdio-disclaimer the list of uncovered ãudio devices. The end of a search range is usually lower than the value returned by the Demurse-Cache-Time property, because this property returns the guessed buffer value, while search intervals represent the buffer data that can actually be used â € sp for cache search. And-paid if the end of the reproduction was reached. In attempts to seek outside the for the search time is considered the current position during the search.) Chapter (RW) number of the current chapter. File size length in bytes of the file/origin flow. Parano meters of volume in volume-params, such as the decoder (with (with As an aspect etc. In addition, external files (such as separate files or flows) do not influence the value of this property (currently). Owner if there is this entrance, the name of the script (or similar) that added this connection. Note that the precision of these properties is influenced by some factors. No fps measured fps. List of profiles the list of profiles and their containment. applied). V) params just like paramas, but none applied replacement. Each option has a name and a value, with the value currently always being a string. Seeking if it is usually possible to search the current file. DMCA.com has digitized and approved this specific for protection. OSD-PAR is the last known asd pixel aspect (can be 0). It is not always available. (Exact values subject to changes.) Chroma-Location/CHROMA-LOCATION LOCATION LOCATION. When consulting the property with the client's API using MPV_format_node, or with moon MP.get_Property_native, this will return an MPV_Node with the following contain: mpv_format_node_array MPV_NODE_MAP (for each filter input) MPV_format_flag Key "mpv_format_string" value "mpv_format_string too © m is possible to write the property using this format. It may not be available on all platforms. Often the intervals override a little before they join. Metadata/List/n/Value Value NTH input Metadados. (It is calculated from two quantities not confinable: FPS and flow length.) The number of estimated current current framework in the current flow. (It is not always accurate.) Sampling rate of the list of lanes/n/demux, as indicated by the containment. Option-info//Enter the name of the type of option, such as string or compromise. With some you (like the GPU), this can never be known in advance, but only when the He tried to create the HW decoder successfully. success. Type with the type of frame, n with the passage based on 0 and m with the sample sample based on 0. Window Size Multiplier on Window Scale (RW). Returns inactiva yes/True if no files are loaded, but the player is because of the option - -ident. Prior to MPV 0.31.0, this showed the real edition selected in execution time, if you have not defined the option or manually. Buffer State from cache to percentage (0-100) from cache filling status that the player is not wave (related to paused cache). Configuring this will resize the Video window for the values contained in Dwidth and Dheight MultiLigend with the value set with this property. Depending on how baminary was constructed, it may contain a release version or just a hash git. Option-info//name the name of the option. How exactly these calculated values can change in the future. The special input with the name defined as automatically selects the pattern and standard device. Track-List/N/SRC-DID ID of the track, as used in the source file. Mouse-pos only reading-last known mouse position, normalized dimensions for OSD. Range/n/n/eg yes/True if the track has the significant form defined in the file, no/false or indispressible if constant. (This property must replace-input-cmdlist. (The result is not necessarily correct, but it seems better for display purposes. LINE. Value of the window scale. Chapter Metadada-Chapter Current Chapter. There are no editions, this can be 0 or 1 (1 if there is a fictional issue of a lot). This is similar to what audio channels accept. Now we put Twitpic in a filed state. State.
