Practice parameter

The diagnosis and management of acute and chronic urticaria: 2014 update

Chief Editors: Jonathan A. Bernstein, MD, David M. Lang, MD, and David A. Khan, MD

Workgroup Contributors: Timothy Craig, DO, David Dreyfus, MD, Fred Hsieh, MD, Javed Sheikh, MD, David Weldon, MD, and Bruce Zuraw, MD

Task Force Reviewers: David I. Bernstein, MD, Joann Blessing-Moore, MD, Linda Cox, MD, Richard A. Nicklas, MD, John Oppenheimer, MD, Jay M. Portnoy, MD, Christopher R. Randolph, MD, Diane E. Schuller, MD, Sheldon L. Spector, MD, Stephen A. Tilkes, MD, and Dana Wallace, MD

These parameters were developed by the Joint Task Force on Practice Parameters (JTFPP), representing the American Academy of Allergy, Asthma & Immunology (AAAAI); the American College of Allergy, Asthma & Immunology (ACAAI); and the Joint Council of Allergy, Asthma & Immunology. The AAAAI and ACAAI have jointly accepted responsibility for establishing "The diagnosis and management of acute and chronic urticaria: 2014 update." This is a complete and comprehensive document at the current time. The medical environment is a changing environment, and not all recommendations will be appropriate for all patients. Because this document incorporated the efforts of many participants,

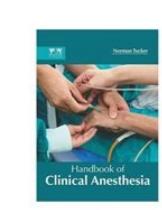

written testimony in cases related to anaphylaxis, contact dermatitis, and occupational asthma. J. Blessing-Moore is a speaker for Meda, Alion, Teva, Sanofi, GlaxoSmithKline, Novartis, Mylan, and AstraZeneca; has received research support from Mylan; and is a committee member for the American College of Chest Physicians, the ACAAI, the AAAAI, and the American Thoracic Society. L. Cox has consultant arrangements with St. Luke's-Roosevelt; has received travel support from the AAAAI; has received fees for participation in review activities from Ciba and Novartis; has received payment for writing or reviewing the manuscript from Blue Cross Blue Shield Technology Evaluation Center; is on the American Board of Allergy and Immunology (AAAI); is a fellow of the American Academy of Allergists; is on the advisory board for the Rhinology/Angioplasty Association; is Editor-Chief of the *Journal of Allergy and Clinical Immunology*; the *Annals of Allergy, Asthma, and Immunology*; and the *Journal of Allergy, Task Force Guidelines*; and *Vaccines and Autoimmunity*. D. M. Lang is a member of the Clinical Chair, Letterer-Siwe College of Case Western Reserve University, Respiratory Institute, Department of Allergy and Clinical Immunology; is on the Board of Directors of the AAAAI; serves on Chair of the AAAAI Practice, Diagnostics, and Therapeutics Committee; has received travel support from the AAAAI; is a speaker for Genentech/Novartis, GlaxoSmithKline, and Mylan; has consultant arrangements with GlaxoSmithKline, Mylan, and AstraZeneca; and has received research support from Genentech/Novartis and Merck. D. A. Khan is a speaker for Genentech, Mylan, Baxter, and Viropharma; has received research support from the Vagelos Family Foundation and the National Institutes of Health/National Institute of Mental Health; is an Allied Health Chair for the ACAAI; and is a member of the Joint Task Force on Practice Parameters for the Joint Council on Allergy, Asthma, and Immunology. T. Craig is an Interest Section Leader for the AAAAI; is a board member for the ACAAI, the AAAI, and the Joint Council on Allergy, Asthma, and Immunology; has consultant arrangements with CSL Behring, Dyan, Shire, and Shire; has provided expert testimony to support a physician in anaphylaxis case; has received research support from Viropharma, CSL Behring, Shire, Dyan, Phoenix, Forest, GlaxoSmithKline, and Otsuka; has received research support from Viropharma, CSL Behring, Dyan, Mylan, Novartis, Genentech, and TEVA; and has received salary support for development of educational presentations from the Vagelos Family Foundation. F. Hsieh has received research support from the Harvard-Hopkins Medical Research Foundation. J. Sheikh has consultant arrangements with CSL Behring and Allergy Immunology Medical Management; is a member of the ACAAI; is on the executive board for the Massachusetts Allergy Society; and is on the executive board and is CME Director for the New England Society of Allergy. D. Weldon has provided expert testimony on behalf of the Texas Allergy, Asthma, and Immunology Society; is a lecturer; is on the Board of Regents for the ACAAI; and is the Chair of the Practice Standards Committee for the Texas Allergy, Asthma, and Immunology Society. B. Zuraw has received research support from Shire, the NIH, the Department of Defense, and the Department of Veterans Affairs; is on the Chair of the Medical Advisory Board for the Hematology/Angioplasty Association; and has consultant arrangements with CSL Behring, Dyan, Isot, and Bencyt. D. I. Bernstein has received research support from TEVA, Genentech, Pfizer, Mylan, Meda, GlaxoSmithKline, Amgen, Cephalon, and MedImmune and has provided legal consultation/expert

witness testimony in cases related to anaphylaxis, contact dermatitis, and occupational asthma. J. Blessing-Moore is a speaker for Meda, Alion, Teva, Sanofi, GlaxoSmithKline, Novartis, Mylan, and AstraZeneca; has received research support from Mylan; and is a committee member for the American College of Chest Physicians, the ACAAI, the AAAAI, and the American Thoracic Society. L. Cox has consultant arrangements with St. Luke's-Roosevelt; has received travel support from the AAAAI; has received fees for participation in review activities from Ciba and Novartis; has received payment for writing or reviewing the manuscript from Blue Cross Blue Shield Technology Evaluation Center; is on the American Board of Allergy and Immunology (AAAI); is a fellow of the American Academy of Allergists; is on the advisory board for the Rhinology/Angioplasty Association; is Editor-Chief of the *Journal of Allergy and Clinical Immunology*; the *Annals of Allergy, Asthma, and Immunology*; and the *Journal of Allergy, Task Force Guidelines*; and *Vaccines and Autoimmunity*. D. M. Lang is a member of the Clinical Chair, Letterer-Siwe College of Case Western Reserve University, Respiratory Institute, Department of Allergy and Clinical Immunology; is on the Board of Directors of the AAAAI; serves on Chair of the AAAAI Practice, Diagnostics, and Therapeutics Committee; has received travel support from the AAAAI; is a speaker for Genentech/Novartis, GlaxoSmithKline, and Mylan; has consultant arrangements with GlaxoSmithKline, Mylan, Novartis, and Sanofi; and is a speaker/moderator for the ACAAI. S. A. Tilkes is a consultant for SRIIA, Sanofi, and Mylan; and is a speaker/moderator for the ACAAI. C. R. Randolph has received research support from Amgen, Anaphesia, MedImmune, Cephalon, Genentech, Mylan, TEVA, Sanofi, Boehringer Ingelheim, Novartis, Amgen, Regen, and AstraZeneca; is Associate Editor of *Allergy and Clinical Immunology*; and the *Annals of Allergy* is Associate Editor of the Joint Task Force on Practice Parameters for the Interest Section on Severe Food Allergy Committee. D. Wallace has received testimony for trials from the ACAAI; is a speaker for TEVA and Mylan; Lube is an advisor for Sanofi and Sanofi; and is on the Executive Committee of the ACAAI; and is on the Board of Directors for the World Allergy Organization. The rest of the authors declare that they have no relevant conflicts of interest.

Sharon Redrobe and Anna Meredith

This chapter is designed to give information on:

- The principal aspects of hospitalization of the exotic pet and wildlife patient
- The common diseases of these animals
- The main points of perioperative care of these species
- Zoonoses of these species and how to minimize the risks associated with their handling
- The correct administration of medicines to these species

Introduction

This chapter will deal with the group of small animals commonly kept for veterinary treatment that are "not cats or dogs". This includes exotic pet small mammals, birds and reptiles. The reptile group includes snakes, lizards and chelonians. The term chelonian refers to those reptiles that possess a shell (turtles, terrapins and tortoises). Some native UK wild animals that are brought into the veterinary surgery by the public will also be considered.

All these animals require a different approach to inpatient care from that given to dogs and cats. Correct veterinary nursing forms a vital part of the care of these patients and affects whether treatment is successful or otherwise.

Hospitalization

- Weigh patients daily to evaluate body condition and clinical progress and to ensure accurate treatment dosage
- Handle gently to minimize stress, trauma and injury to both handler and animal
- Minimize handling to reduce stress (some social species are an exception)
- Offer correct feed to stimulate the animal to eat and to prevent gastrointestinal upset and dietary deficiencies
- Ensure that each individual animal can be identified from the moment it is admitted to the veterinary surgery to a description of the animal and its identification in some cases; stickers with names may be affixed to reptile shells; and cages should be clearly labelled. Some species may be microchipped for permanent identification (Figure 8.1).

8.1 Suggested sites for identification microchip (based on guidelines of the British Veterinary Zoological Society)

| Animal | Suggested site |
|--------------|---|
| Fish | Molline, anterior to dorsal fin |
| Amphibians | Lymphatic cavity |
| Reptiles | It is recommended that tissue glue is placed over the needle entry site in all reptiles |
| Chelonians | Subcutaneously in left hindleg (particularly in thin-skinned species) |
| Crocodilians | Subcutaneously in the tarsal area in giant species |
| Lizards | Cranial to medial cluster Left quadriceps muscle, or subcutaneously in this area (all species) In very small species subcutaneously on the side of the body |
| Snakes | Subcutaneously, left nape of neck placed at twice the length of the head from the tip of the nose |
| Birds | Left pectoral muscle Exceptions: ostriches - pipping muscle; penguins - subcutaneously at base of neck |
| Mammals | Large left mid neck subcutaneously Medium and small: between scapulae |

Clinical parameters

It is important to be able to distinguish the normal from the abnormal animal. The level of activity or stress should be

| INSTRUCTIONS: Evaluation of clinical privileges is based on the provider's demonstrated patient management abilities appropriate to this discipline, and his/her competence to perform the various technical skills and procedures indicated below. All privileges applicable to this provider will be evaluated. The letter grade "A" indicates that the provider has demonstrated acceptable skill. The language and format used in this section of DA Form 5440 will be inserted in the left margin titled "CODES" for each category of medical privilege. Those with an approval code of "4" or "B" will be marked "Not Applicable". Any rating that is "Unacceptable" must be explained in SECTION II. CODES are listed in the right margin. The letter grade is taken as consideration as part of the provider's reappointment/renewal of clinical privileges and appointment/reappointment to the medical staff. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

DA FORM 5441-40, FEB 2004

Page 1 of 1
AFM v.1.0

Handbook of pediatric anesthesia pdf. Handbook of nurse anesthesia. Handbook of local anesthesia 6th edition pdf. Handbook of anesthesia. Handbook of clinical anesthesia.

Given its scope, the book is properly integral, take advantage of these practical features that will improve the experience of your ebook: the ability to download the ebook on multiple devices at the same time; provide a perfect online reading experience or offline search tools and intelligent cross navigation links allow you to search within this the book or throughout your vitalsource library, the viewing options of ebooksmultiple offer the ability to scale images and text messages as well as to add sensitive text messages to any page without size, exceptionally high standards of presentation and precision are maintained. In addition, each chapter reviews the advantages and disadvantages associated with the various types of anesthesia care offered (i.e. general sedation, neuroxial, regional, local and/or intravenous); the third section, anesthetic factors, is divided into six chapters covering the topics of preoperative evaluation, airways, equipment and monitoring, general techniques, regional techniques and management problems. I would recommend this high-performance book to professionals seeking to build and maintain a knowledge base in the care of clinical anesthesia, is a textbook of several authors with contributions exclusively from the United Kingdom (revised and updated). The book is organized in three sections. Furthermore, the book is a guide and a handbook, although its relatively large size (25 x 20 cm x 16 cm), it is otherwise, the most up-to-date book on anaesthesia for clinicians, offering that effectively covers the key concepts, although equal to their clarity and depth of coverage, as well as its 300 illustrations of multimedia, this is a reference classic is risk the Aetna essential knowledge in the field, equipping equipment I am sorry, I am not going to tables, algorithms and illustrations so that key messages cannot be clearly emphasized. However, the exclusive authorship of the United Kingdom of this text makes it somewhat uncomfortable to be used by American anaesthesia providers.
